SPEAKER/CLASS

Carlos Pichardo

DATE - TIME

Title: MBSE

Keyword

Arcadio

Capelio

OOSEM

Topic: Languages, methods, and Frameworks

Notes: SysML V1/V2: language standard for structure, requirements, blocks, ports/interfaces, states, activities, Signatures, and now in V2 with syntax more regular, semantics more precise and API standardized for interoperability.

Arcadio/Capelio: methodology and toolchain for engineering of architecture (operational -> systems -> logic -> force) recognized by AFNOR as standard Z67-140, very used in aerospace/defense

Questions

Representative tools

- Cameo Systems Modeler (Dassault), IBM Rhapsody, Sparx Enterprise Architect, Capelio (Eclipse).
- With SysML V2, the tools begin to expose/consume the system modeling API services enabling digital thread with PLM/CRM/ALM

Summary:
